# **PRODUCT DETAILS**

Manufacturer:

Name Product Design Group

Address Unit 103-318 East Kent Avenue South, Vancouver, BC, Canada VSX4N6

Chair type:

Frame:

Size Adult

Frame Rigid frame, tilting

Tilt Yes
Recline No
Anti-tips Yes

Push handles Single bar type
Footrests Individual, lift out

Armrests Height adjustable, removable

Headrest No

Seating:

**Backrest** 

Width 410 mm Height 552 mm

Description Sling type fabric backrest

Seat

Width 595 mm Depth 475 mm

Description Metal base with removable padded cushion

Wheels:

CastorFrontRearWidth50 mmn/aDiameter150 mmn/aDescriptionPneumatic tyresn/a

Drive Wheel

Width 40 mm Diameter 600 mm

Description Pneumatic tyres

Other features: Tilt function

Set-up details To AS3695.22 requirements

(to AS3696.22) (No castor wheel or drive wheel adjustments available)

Note: Other descriptive dimensions etc. may be included in part 5 and 7 of the test report

Clause in ISO 7176- 1:1999	Test Requirement Result of Verification				
	s - Static stability				
	on the direction of tip, wheelchairs can tip a		-		
	ocked with respect to the frame or about the			• •	
angle of slop	be on which the wheelchair will tip about th	ne most unstable axis is measu	ured on a	test plane with	
an adjustabl	e slope by increasing the angle of the test	plane until the tipping angle is	reached.

ISO 7176	-15:1996 Requirements for information disclosure, documentation and labelling.	
Clause	Requirement	Result
5.	Requirements for disclosure of test information in manufacturer's specification sheets.	
	Specification sheet must contain the following:	
a)	The model designation and/or any other information that will uniquely identify the wheelchair model	Pass
b)	The mass of the test dummy used in the test	Pass
	Either: i) the performance values listed in Annex A, in the order and using the wording shown	Pass
c)	Or: ii) if the part of ISO 7176 specifies a method of disclosure, that method shall have precedence over i)	NA
d)	Maximum occupant mass	Pass
6.	Test report	
	Are performance values resulting from the testing of a specific model of wheelchair to parts of ISO 7176 disclosed as specified in the relevant part of ISO 7176?	Pass
7.	Documentation	
	General:	
7.1	Is the following information available in the official language of the countries in which the wheelchair is marketed?	
a)	The specification sheets	Pass
b)	A statement as to which features and options are included in specific models	Pass
c)	A description of the intended user (eg mass, indoor / outdoor use etc.)	Pass
٦١)	Either: i) details of warranty	Pass
d)	Or: ii) If no warranty is provided, a statement to that effect	NA
e)	Information on how to get repairs and service	Pass
f)	Information as to whether a service manual is available	Pass
g)	A user manual	Pass
7.2	User manual:	
	At least 1 copy of the users' manual to be supplied with the wheelchair	Pass
	Where illustrations are used:	
	- Components numbered or named for positive identification	Pass
	- Illustrations numbered or named for positive identification	Pass
7.3	Contents of user manual	
	User manual to contain the following information:	
a)	Details of the warranty as specified in 7.1d	Pass
b)	General characteristics as follows:	
b) i)	Description of the wheelchair type, accompanied by pictures or drawings of the wheelchair & a non-technical description of how the chair is intended to be used	Pass
b) ii)	Description of the intended user, including maximum occupant mass	Pass
b) iii)	The environment in which the wheelchair is intended to be used and any other environmental conditions that might be harmful to the wheelchair, such as temperature and humidity	Pass
b) iv)	If pneumatic tyres are fitted, the recommended inflation pressure or range in kPa	Pass
c)	If the wheelchair is marketed for user assembly, shall contain the following information:	
c) i)	A list of components	Pass
c) ii)	Information about tools or equipment needed to assemble the wheelchair	Pass
c) iii)	Instructions on how to inspect for missing or damaged parts	Pass

Clause	Requirement	Result
c) iv)	Instructions for assembly, installation or removal of any parts supplied by the manufacturer	Pass
c) v)	Instructions on how to prepare the wheelchair for storage, shipment or travel	Pass
, ,	Instructions for operation of the wheelchair as follows.	
d)	Complete operating instructions for safe use including:	
	- Instructions for operating the wheelchair on surfaces likely to be encountered by the user	Pass
d) i)	- Instructions for transfer of the user to and from the wheelchair	Pass
۵, ۱,	- Illustrations to clarify these instructions	Pass
	Any common misuse of the wheelchair known by the manufacturer that might lead to	
d) ii)	personal injury or damage to the wheelchair.	Pass
e) i)	Maintenance instructions accompanied by annotated illustrations and the following:	
, ,	- Any service, maintenance &/or fault -finding for which the manufacturer intends the user to	Davis
	be responsible for.	Pass
	- Information about the types of tools or equip needed for repair and servicing	Pass
	- Frequency of maintenance	Pass
	- A list of materials necessary, including part numbers and procurement information	Pass
	- Identification of circumstances in which an operation should be undertaken by the	Pass
	manufacturer, distributor or service agent	
e) ii)	Instructions and methods of cleaning	Pass
e) iii)	For parts that the manufacturer intends to be readily replaced, the following:	
	- order information	Pass
	- Instructions for access removal	Pass
	- replacement and testing	Pass
	- Annotated illustrations of the parts (including tyres & batteries) & their locations	Pass
e) iv)	Information on how to perform potentially hazardous maintenance operations, such as	Pass
	battery servicing and tyre inflation	1 433
f)	Instructions for carrying out performance checks	NA
g)	Description of wheelchair repair procedures as follows:	
g) i)	Identification of parts that are intended to be repaired by the user	Pass
g) ii)	Identification of parts that have to be serviced by the manufacturer or an authorised service	Pass
\ :::\	facility in order to maintain any warranties and serviceability	
g) iii)	Identification of any parts that can be removed and sent to the manufacturer / distributor or other party for repair.	Pass
g) iv)	Identification of circumstances in which the manufacturer, distributor or service agent should	_
9),	undertake the repair	Pass
g) v)	A list of authorised service facilities	Pass
g) vi)	Information on whether or not any replacement units are available	Pass
g) vii)	Packing and shipping instructions where necessary	Pass
8.	Permanent labelling	
8.1	The following information to be marked in a permanent manner on the wheelchair:	
a)	The name and address of the manufacturer	Pass
b)	The model designation and serial number	Pass
c)	The year of manufacture	Pass
d)	Any driving restrictions	Pass
e)	Recommended maximum user mass	Pass
8.2	Tyres to be marked with size	Pass

Rema	arks
------	------

Information disclosure: Results marked n/s refer to values not included in owners /operators manual. WW. End of remarks -----

The sample submitted for this test satisfies the relevant requirements of ISO 7176 -1, 3, 5, 7, 8, 15, 16 & 22 Wheelchairs (except the methods indicated in this report as "not tested" and/or tested with deviations).

Yes

### **NOTES**

1 U<sub>os</sub> Uncertainty of measurements where not specified; linear +1mm, angular + 30', force, mass +1%, temperature +1°C, cycles +1

count. This means the true measurement is within the stated tolerances at least ninety five times in one hundred
2 All testing was carried out in a controlled environment laboratory using methods set out in the Standards documents, all deviations and additions to the Standards' methods are noted in remarks.
3 All instruments either carried valid calibration certificates throughout the test period or were checked against traceable Standards before and after use.
4 The NovitaTech Test Laboratory has no control over the selection of test samples. Any extension of the findings of this report to cover production items must be based on production being truly represented by the sample(s). 5 Any non-conformances are indicated in red.
